Pacejet

Pacejet Enterprise Shipping for NetSuite
The Only **Complete** Freight Quoting and Shipping Solution Built for NetSuite

Built For NETSUITE

Pacejet provides **access** to more integrated shipping services, **visibility** with freight quoting and rate-shopping, and **automation** to ship faster and more accurately. More NetSuite users connect to more carriers via Pacejet than any other cloud software, processing millions of LTL, Parcel, and 3PL quotes and shipments to reduce costs, improve efficiency, and eliminate errors.

Key Benefits for NetSuite Users

- **Adds Full LTL and 3PL Shipping** with integration to leading freight services

- **Enhances Parcel Shipping** with more services for UPS, FedEx, USPS, and more regional / global parcel carriers

- **Reduces Costs 10-20%** via real-time freight quotes including support for negotiated rates, freight class, dimensions, special services

- **Reduces Costs 20-30%** with automatic rate-shopping that finds the lowest cost shipping service for each order

- **Improves Usability and Speed** with one multi-carrier user interface and shipping process for all services

- **Improves Efficiency and Throughput** with automatic paperwork such as bill of lading and commercial invoice

- **Eliminates Duplicate Data Entry and Transcription Errors** via direct carrier integration without software apps

- **Adds Flexible Shipping Enhancement** with built-in packing, WMS support, compatibility with other SDN apps

About Pacejet
Pacejet is the most complete freight quoting and shipping solution built for NetSuite. More NetSuite shippers use Pacejet to quote, pack, and ship with more LTL, Parcel, and 3PL carriers than any other cloud software.

Features
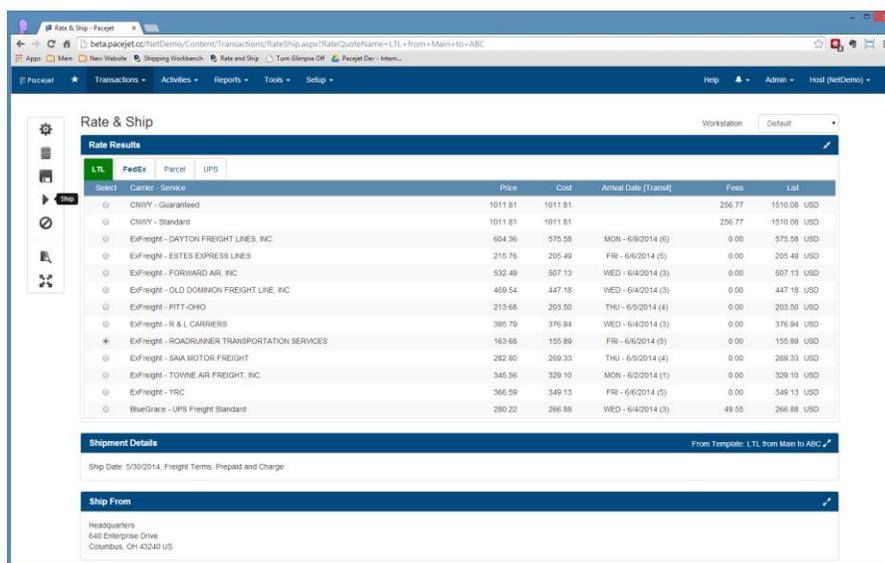

Enhanced NetSuite Shipping Experience

Ship with an expanded range of carrier services using one cloud software application that is more efficient and easier than multiple bolt-on PC applications.

- Ship via LTL and 3PL freight services with automatic ProNum and Bill of Lading
- Use enhanced UPS, FedEx, USPS parcel shipping with features such as negotiated rates, commercial plus pricing, multiple carrier accounts, or dimensional pricing
- Export with HST / NAFTA data capture, Commercial Invoice, Certificate of Origin
- Add expanded parcel shipping with regional and global carrier service options
- Quote, pack, and ship with all carriers via one unified user experience

Freight Quotes with Rate Shopping

Quote shipping costs to customers with increased accuracy and use automatic rate shopping to find the lowest cost shipping service for each order.

- Quote shipping costs for Orders, Fulfillments, Estimates, Transfers, Purchases
- Rate-shop across all Parcel, LTL, 3PL shipping services to find the lowest cost
- Connect quoting to your SuiteCommerce sites to offer expanded shipping options
- Capture shipping costs and use flexible freight pricing rules to automate billing

Customer Quotes

"Pacejet enabled us to see significant cost savings, helped us maintain excellent customer service while giving us the flexibility to keep improving our shipping operations."

-- President of ursource

"Pacejet revolutionized the way we manage shipping by consolidating all of our carriers, rules, and data in one system. We can rate-shop to quickly find the lowest cost shipping method… Pacejet also provides shipping data we've never had before."

-- Operations Manager, BarProducts.com

"By using Pacejet, we can quickly work with multiple carriers in one solution to find the best shipping prices and reduce costs for our company and our customers … helps our team complete tasks in seconds that used to take minutes."

-- General Manager, The ToolNut

"Pacejet gives our team the confidence to pick the right method of shipping to save money and improve the customer experience."

-- COO, Thos. Baker

"Pacejet was the perfect match for our shipping needs."

-- Director, United Exchange Corporation

Advanced Packing, Advanced Paperwork, Consolidated Shipping

Automate your complete pick-pack-ship fulfillment process with Pacejet advanced packing features or use consolidation to combine fulfilments together.

- Pack shipments with built-in tools to capture dimensions, weight, freight class, insured/declared value and easily drag-n-drop products into containers
- Scan products into containers as you pack to validate items and quantity
- Print advanced paperwork and labels including packing lists, container contents labels, basic UCC128 labels, combined pack-slip shipping labels, and more
- Capture container weights from scales electronically through USB interface
- Auto pack products in containers to improve freight quoting accuracy
- Consolidate multiple fulfilments into a single container for shipping

Compatibility with Scanning, WMS, EDI Add-Ons

Run Pacejet shipping with standard NetSuite, while using other Built for NetSuite warehouse scanning applications, or while using the NetSuite WMS modules.

- Use Built for NetSuite scanning applications with Pacejet for shipping
- Use NetSuite WMS applications with Pacejet for shipping
- Use Built for NetSuite EDI applications with Pacejet for shipping

High-Volume Fulfillment Support

Use optimized shipping workflows to process orders in batches, group orders together for shipping, or streamline processing steps as your volume grows.

- Rapidly scan, rate-shop, and ship via the shipping workbench
- Automatically rate and ship small batches with a few clicks
- Use asynchronous shipment staging for optimized pack-and-ship
- Use asynchronous ERP updates for optimized carrier updates
- Manage rate-shop, ship, print, ERP update tasks independently for easier management and automation of very large shipping batches

Consolidated Shipping Data and Reporting

Report on spending and shipping details for all carriers together, analyze savings from rate-shopping, and explore opportunities to increase your savings.

- View and track daily and weekly shipments via shipping dashboard
- Display and print daily shipment summary for all carriers and modes
- Summarize and export shipping detail to Excel for further manipulation
- Use the shipment savings report for spending, savings, potential savings

---

Pacejet requires the following pre-requisites for implementation with NetSuite, please contact your NetSuite representative for more information:

- NetSuite pick, pack, ship feature must be activated.
- NetSuite shipping label integration should be off.
- NetSuite basic UPS, FedEx, USPS must be turned off.
- Fully automated printing requires local install of print connector.
- NetSuite SSO and Token-Based Authentication are recommended.
- Scale integration supports USB hardware interfaces only.
