

Why You Need Kuebix TMS

Logistics professionals are struggling with the high cost of legacy transportation management systems (TMS) and their time-consuming implementations.

Kuebix solves this by offering a modular, scalable and intuitive TMS that supports all modes of transportation. And since it's built on the latest cloud technology, Kuebix can seamlessly scale to meet any company's complex transportation needs with the addition of integrations.

By integrating NetSuite with Kuebix TMS, users can streamline their shipping processes, cut down on human error, and position themselves to make the best strategic decisions with the help of advanced reporting.

Who We Are

Kuebix is one of the fastest growing TMS on the market thanks to its agility, usability and rapid implementations that allow users to achieve rapid ROI. Kuebix TMS supports all modes of transportation and the modular system can seamlessly scale to meet the needs of any size company.

Kuebix TMS is well suited for supply chains of all sizes and is rooted in the knowledge that technology can help shippers optimize their freight.

How We Extend NetSuite

NetSuite and Kuebix have partnered together to offer out-of-the-box and customizable integrations to companies who wish to connect their ERP functionalities with their TMS processes. By integrating NetSuite and Kuebix TMS, users can achieve 100% shipment accuracy by avoiding manual entry, reducing time related to keying in orders, and accessing meaningful analytics for SKU-level cost allocation.

Features

- ERP Integrations
- Rate, Book and Track Freight Shipments
- Reports and Analytics
- Freight Pay and Audit
- Claims and Financial Management
- Load Builder and Route Optimization
- Prepay and Add
- Carrier Relationship Management
- YMS and Dock Scheduling

Benefits

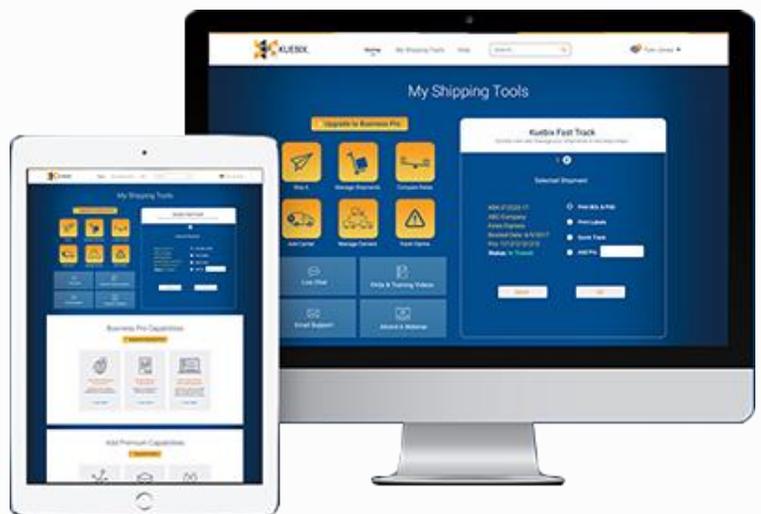

- Streamlined processes and improved visibility with integrations
- Modular, scalable and adaptable as business needs change
- Fast and smooth implementations for rapid ROI
- Intuitive user interface for maximum user experience (UE)

Our Solution

Kuebix's solution is engineered to flex to meet the needs of simple to complex supply chains. NetSuite integrations are added to increase efficiencies for users and to automatically connect processes between the TMS and ERP.

A team of Kuebix experts works directly with users to determine the optimal integration and ensure a smooth implementation.

ROI is quickly earned as shipment accuracy increases to 100% by avoiding manual entry, time related to keying in orders is saved and users leverage meaningful analytics on SKU-level cost allocation.

Kuebix TMS simplifies transportation operations and can be optimized by integrating directly with NetSuite.
